

AN  
ALMANACK  
AND  
PROGNOSTICATION

23

FOR THE  
Year of our LORD 1657  
BEING

The first after *Bissextile* or *Leap year,*  
And since the Creation of the  
World, 5606.

Containing a brief description of the four  
*Quarters* and *Eclipses* happening  
this present year.

Also a Description of the Fairs of *England*  
and *Wales*, With a Geographical De-  
scription of the High-waies  
from the most remarkable  
Towns to the City  
of *London*.

Together with several Tables very necessary  
for the use of all men.

By Charles Temple.

LONDON, Printed for the Com-  
pany of Stationers.

# Common Notes and moveable Feasts, for the

Year of our Redemption, 1657.  
according to the  
Julian, English or old 32 Gregorian Foreign,  
Account: or New Account.

1	The Golden number.	1
14	The Cycle of the Sun.	14
25	The Epact.	25
30	The Dominical Letter.	G
10	The Roman Indiction.	10
1	The Number of Direction.	1

## Moveable Feasts.

January 25	Septuagesima.	28 January.
February 11	Ashwednesday.	14 February.
March 29	Easter day.	1 April.
May 8	Rogation Sunday	7 May.
May 7	Ascension day.	10 May.
May 17	Whitsunday.	20 May.
May 24	Trinity Sunday.	27 May.
November 29	Advent Sunday.	2 December.

A plain and easy Table, shewing the true Interest due upon any sum of Money, from five shillings to an hundred pounds for a year, or under, after the rate of six per cent. in the hundred.

90	09 0	27 0	54 0	81 0	108 0
100	10 0	30 0	60 0	90 0	120 0

The use of this Table is this. If thou wilt know what the Interest of One hundred and five pounds is for 9 Moneths at six per cent. then in the first column finde out 105. at the foot of the column; and right against it under the Title 9 mon. which is the fifth column; and there thou shalt finde 4 l. 10 s. and against the number 4 l. thou shalt finde 4 s. 6 d. so that the Interest of 105 l. for 9 moneths, cometh to 4 l. 14 s. 6 d. the like of all the rest.

The beginning, continuance, and ending  
of the Kings Reigns since the Conquest, with  
the time how long it is since, to this  
Year, 1656, Being fit for Scriveners, and such  
as are employed in Law causes.

A BRIEF  
PROGNOSTICATION  
OF  
The ECLIPSES, and four Quarters of the  
year, 1657.

Also a *Compendious Chronology*: Together  
with a very useful Description of the Fairs in En-  
gland and Wales. And a Geographical  
Description of the High-ways in  
England and Wales.

---

*Of the four Quarters of the year.*

*First of the Spring.*

The Spring begins the 10: of March at 1: of the  
clock in the morning, at which time the Sun  
enters the first degree of Aries.

This Quarter is by nature hot and moist, and  
therefore most suitable for production. It is an old  
Said in Philosophy, That heat is the Father,  
and moisture the Mother.

This Quarter is the only fit time for those that  
are affected with distempers, to apply themselves  
to Rules of Physicks. The diseases incident to this  
Quarter are, Tertian Fevers, Jaundies, Im-  
potencies, Boils, Itches, Cancers, Morbun-  
g, Ring-worms, Scabs, Small-Pox, Disturba-  
nces, Spotted Fevers, and such diseases as arise  
from the corruption of the blood.

# December hath XXXI Days.

postumes, Boils, Itches, Tetters, Morpue,  
Ring-worms, Measels, Small-Pox, Obstruc-  
tions, Spotted Feavers, and such diseases as arise  
from the corruption of the blood.

Of the Summer.

**T**he Summer Quarter beginneth upon the Suns entring of Cancer, which will be upon the 11. of June; the Suns outmost Northern declination maketh the hottest weather, and longest dayes to us of the Northern Hemisphere, and contrariwise to them of the South.

This season is hot and dry, good for the ripening of fruits. The sicknesses and infirmities of this Quarter, are such as are ingendered of the humours by the temper of the season, viz. Hot burning-feavers, Phrenies, and Plurisies, Inflammations, Imposthumes, and Ulcerations in the Lungs, causing extreme stinking Breaths.

Of Autumn.

**A**utumn or Harvest beginneth upon the Suns entring into Libra, the which will be this year the 13. of September, which again bringeth the nights and days to an equality. This season is of all others the most uncertain; it is of nature cold and moist; therefore dangerous; for that it wants heat to digest the Crudities of the humours.

Therefore the diseases of this Quarter, are Quartane-feavers Apoplexies, Falling-sickness, Lethargy, Fluxes, Pain in the Back and Reins, the Stens, Palsies, Convulsions, Cramps, Consumptions, Obstructions of the Spleen, Melancholly: and such like.

The Winter Quarter.

**T**he Winter beginneth at the Suns entrance into Capricornus, which is upon the 11. day of December, at which time the days are at the shortest, by reason of the Suns being at his utmost Southern declination; The temper of this season is Cold and Dry. The diseases, incident to this Quarter are, Rheums, Coughs, Palsies, Gout, Cramps, Convulsions, Collick, Apoplexies Hoarsnesse, Flux, and pain in the Throat.

Of Eclipses happening this present year,

1657.

FOUR Eclipses happen this year, viz. two of Sun, and as many of the Moon; the two former not visible to us: the first happening upon the first day of June, near ten at night, a small Eclipse visible in the extreame parts of North America, Quivira, &c. and those parts under the Longitude of 220. degrees, 15. min. and Latitude North 59. deg. The second of the Sun, November the 25. near seaven in the morning, but (by reason of the Parallax of the Moon) cannot be seen by us: it will be visible in the Longitude of 79. deg. 58. min. and South Latitude 59. degrees in the remote Southern parts, unknown to us: I shall say no more of these; but come to the two Lunar Eclipses, visible to us.

The first on the 15. of June 1657.

		H.	M.	S.
The beginning,	} at }	6	46	57.
The middle,		8	39	32.
The end,		10	32	7.
Total duration,		3	35	17.
Digits Eclipsed,		13.		

Daily experience teacheth, that neither of the Luminaries be at any time Eclipsed, but it doth portend some some evil to happen; God and nature doth nothing in vain. Non est negandum, et celestia vel aerea verenta, sepe fuisse prænuntia calamitatum; saith Molin, none can deny, but that celestial or airy Prodigies are oftentimes the messengers of calamity. Ex Eclipsibus magni effectus proveniunt, saith Dasipodius, Great effects are produced by Eclipses; but we come to the

## A Prognostication

Subject we have to handle, viz. a Lunar Eclipse, celebrated in the fourth degree of the Goat: the beginning under the earth in the Ascendant; the middle in the twelfth; and the end in the eleventh.

This Eclipse will be totall, with duration from the middle to the end, visible to us, if the clouds interpose not and darken the aire, which I much fear: I proceed to a few words, concerning the Effects of this Eclipse.

The Sign wherein the Eclipse happeneth is Tropical, Tropice dant significationem in stationum aeris, et in rebus publicis morum ac legum, Ptolomy. Tropicks signifie an alteration of the aire, and (in upblich matters) a change of Law, and Customs.

In what House of Heaven the Eclipse happens, I told you before, viz. in the twelfth House, not far from the Horoscope. Quæ vero tempore deliquit Orientali magis posita fuerint, fructibus, adolescentiæ, fundamentis eventura, saith the same Author: Those Eclipses which happen near the Horizon, have relation to fruits, to youth, to the foundation or beginning of things.

I shall not comment upon my Author, although the effects of this Eclipse hath much relation to the English Common-wealth, and the Government thereof: who, though they act prudently and uprightly, for the good of the Nation, yet many discouragements are offered them, secret plots and underhand dealings against them.

Proclus saith, That an Eclipse in the first decanate of Capricorn, Suggillationes in homines movet, & præstantis alicujus viri perniciosam eadem ostendit; moveth slaunders against many men, and declareth an untimely death to some great person.

The

for the year, 1657.

The two infortunes ♄ and ♃ claims & domination of this Eclipse, Saturn being Lord of the Sign wherein the Eclipse happeneth, and angle sublequent, Mars being therein exalted; the first entering his exaltation, the second his own House, in opposition to each other, and beholding both the Luminaries with a quadrate Aspect. It would be too tedious to give you the Judgement of our Master Ptolomy, I shall be as brief as I can.

It signifieth long diseases, Consumptions, Fluxes, Quartan Agues, Diseases bringing mortality with them, terrible deaths, banishment, want, distresses, diseases among great and small Cattel, useful for mankind, the bodies of men much prejudiced thereby. Great tempests at Sea, and shipwreck of Rabies: A scarcity of Corn and such grain as is annually sown, Wars and Seditions, Tumults, Rebellions, miserable slaughters and destruction. &c.

I forbear further discoursing of the effects, and come to the places subject to the influence of this Eclipse, viz. those Countries, Cities and Towns under the signs Capricorn, Cancer, Aries, Libra. It will be too tedious to set them all down here, only name a few of the principallest, or at least such as are most commonly known to us, viz. Thracia, Macedonia in Greece, Saxony, West India, the Isle Orchades, Scotland, Holland, Zealand, Russia, Africa, England, France, Germany, Swevia, Silecia the higher, Polonia the less, Denmark, Austria, the Dukedom of Savoy.

Cities and Towns: Oxford, Mechlin, Constantinople, Tunis, Venice, Millain, York, Amsterdam, St. Andrews, Naples, Padua, Brunswick, Lisborn, Frankford, Vienna, Antwerp.

These

## A Prognostication

Those persons who had the Sun or Moon Ascendant, or Mid-heaven, in, or near the fourth degree of  $\nu$ ,  $\zeta$ ,  $\gamma$ ,  $\triangle$ : shall in some measure be sensible of the effects of this Eclipse.

Concerning the time when the Effects shall appear, I shall conclude with Prolomy, Si fuerit proprius Ascendenti, contingeret evenus illi, in primis quatuor mensibus, et maxime effectus, apparebit in prima tertia parte temporis ipsius effectus. Cardan in his Comment upon Prolomy page 248. If the Eclipse be near the Ascendant, the effects thereof shall begin to operate, in the first four moneths, and the greatest effects shall appear in the first third part of time allotted for the continuance of that effect.

The effects of this Eclipse shall begin to shew themselves within the first four moneths after the 15. of June, and shall begin most forcibly to operate about the middle of October, and to continue almost to the beginning of January following.

There will be another Eclipse of the Moon, visible to us from the beginning to the end on Thursday 10. December.

		H.	M.	S.
The beginning thereof,	} at }	5	49	48
The middle,		7	6	10
The end,		8	22	32
The duration,		2	32	44
Digits eclipsed, 4.				

This Eclipse is but small, the greatest obscuration appearing in the eleventh House, Jupiter at the time seven degrees Eastward of the Moon, and Mars upon the Mid-heaven; the Eclipse being but small, I shall say no more of it.
